

CUSTOM ENCLOSURES

by Sport Systems Unlimited

Introducing **Custom Enclosures**, the line of customizable barriers, dividers, enclosures and walls from Sport Systems Unlimited.

From portable, easy-to-erect outdoor **crowd control barriers**, to permanently installed **aluminum and glass divider walls**, to animal pens, in our ever-expanding family of Custom Enclosures products, you'll be sure to find a solution for every need.

Custom Enclosures means barriers and enclosures for **temporary, portable, permanent, semi-permanent and multiple uses**, customized for every job the possibilities are essentially limitless. Here are just a few examples of what Sport Systems Unlimited's Custom Enclosures can do for you:

- In **amusement parks** and **fairs** custom designed kiosks for food preparation and sales or ticket sales
- On **farms**, or in agricultural shows and fairs, to keep animals calm, separated or isolated.
- In **construction zones**, to maintain vehicular and pedestrian traffic control, preventing collisions between cars and people.
- In sensitive **pharmaceutical manufacturing or packaging areas**, to maintain physical separation of different product packaging lines.
- In retail, commercial, and institutional facilities, to create **walkways, work areas, meeting spaces, office partitions, product testing or quality control areas**.
- At schools, colleges, universities, to assist in defining space for special events, such as frosh week activities, concerts, and exams.
- In recreational facilities and **gymnasiums**.
- At **daycare centres**, dance halls, or gym classes, to create viewing areas to keep parents separate from, but still able to watch their kids.
- In areas where police or special events teams need to create **VIP partitions** and maintain crowd safety and control.
- In shopping malls, to separate areas of parking lots for **temporary garden centres**.
- In industrial spaces, to divide a larger area into smaller, separate workspaces, or create **in-factory cubicles for quiet and privacy**.

With our line of Custom Enclosures, you will be able to **redefine** idle, vacant or under-utilized space, in factories, offices, warehouses, packaging lines, and distribution centers:

Anywhere space needs definition, Sport Systems Unlimited's Custom Enclosures can help.

And, if required, some of our Custom Enclosures products can be built for approval in **clean room** and **fire-rated** applications or with insulation for **sound protection** as well.

CUSTOM ENCLOSURES

by Sport Systems Unlimited

Where would I find Sport Systems Unlimited's Custom Enclosures?

Pharmaceutical:

At the Laval, Quebec location of pharmaceutical giant **Valeant**, we have installed anodized aluminum dividing walls many of their packaging lines, designed to keep different products separated during packaging.

We have since done many more similar installations for **BioVail**, another multi-national pharmaceutical manufacturer, again customized for the application.

In each case, these walls have been customized to the demanding standards of each customer, including their industry-specific needs regarding minimal ledges, clean appearance and fire-resistance.

Kids:

In Los Angeles, **Buff Buddies**, a day care center / gym for kids chose our aluminum-framed glass Custom Enclosure to separate areas of different activities; parent could watch their kids play, and not be in the way.

Omega Gymnastics in Castle Rock, CO, used plastic facing on Custom Enclosure to separate the reception area from the activities areas, and used a clear tempered safety glass wall to show off their logo.

Texas Skatium Roller Rink installed 48" high glass walls on top of cinder block half walls, plus installed our full height glass wall adjacent, when renovating an old space into a roller rink. Using glass as much as possible to take their small space and make it look bigger, this customer saved money by re-using existing half-walls, and adding our aluminum and glass Custom Enclosure: Truly, the re-invention of space!
