

PUCK FREEZER

Ready to play when you are

No matter where you play, your pucks are always ready to go when you get there with the EdgeStar Portable Puck Freezer. For the ultimate in consistently frozen pucks, this compact freezer will hold a stable temperature under most conditions. It runs off standard household voltage or easily connects to the 12V accessory outlet in your car and features a full range digital thermostat that is adjustable from - 8° F to - 50° F.

Full Range Thermostat

The portable fridge freezer's thermostat can both freeze and refrigerate your pucks.

Fast Freeze Function

A quick push of the Fast Freeze button cools the compartment down to -8 F in a matter of minutes.

AC and DC Adapter Included

Plug the puck freezer into the 12V accessory outlet in your car or any plug in your facility without having to buy extra accessories.

Insulated Metal Walls

With the insulated walls, you can keep your pucks cold long after it's been disconnected.

Storage

The interior of the cooler features two removable wire baskets for efficient storage.
