

# SHIELDING MAINTENANCE PROGRAMS

## The system that makes a difference

### Cleaning Innovations

Athletica and the Arena Services Team are pleased to offer the products and services you need to maintain arena glass and acrylic shielding for spectators, players, coaches, and officials. With our Clear D Zone branded cleaning solutions, we are able to bring environmentally safe cleaning products to market that make cleaning glass and boards a breeze. Replacement tempered glass for chipped or broken panels can be shipped from stock or standard sizes. Custom sizes and thicknesses are also available with expedited lead times for virtually any installed rink.

Our CrystaPlex® 590 Plus Acrylic Shielding replacement panels are also available in optimized thickness for both flexibility and impact resistance. We are able to upgrade existing tempered glass systems to acrylic shielding to meet the needs of competitive leagues requiring player safety upgrades. In addition, Curved Acrylic Terminations can be added to player bench areas where current square transitions present an impact hazard. Tested and Approved for use by the National Hockey League and the American Hockey League – let Athletica manage your upgrade projects for you.

The Clear D Zone cleaning solutions are all specifically selected for compatibility with acrylics and we also have the right tools to make the job easy for you. Buffers, pads, towels, cleaners and polish are available to maintain your shielding system season after season. For replacement aluminum posts, gaskets, glass clips, and netting systems, Athletica is ready to be your trusted partner and supplier.
