

The Optimizer. The Ultimate Rink Divider.

Radiused ends

Easy assembly

Storage cart included

The Optimizer is an aluminum framed rink divider designed for ultimate ease of installation and long wearing performance; the premier solution for arena managers, hockey coaches and associations looking to 'divide the ice' in order to facilitate half-ice practices as recommended by various federations, including USA Hockey's American Development Model (ADM) and Hockey Canada's Cross Ice Initiation Program.

The Optimizer is available in standard 85' and 100' lengths and is shipped on it's own storage cart. Designed for ease of assembly and tear down, Optimizer includes a 28" gate opening panel and standard radiused ends. Each panel measures 90" long by 36" high and is made from aluminum welded frames. Facing is white UV stabilized HDPE with a red or blue top cap. Options include a 42" high version, yellow kickplate, and netting for upper puck containment. Customized panel lengths can be ordered to fit other rink widths.
