

BP Portable Foam Rink Divider.

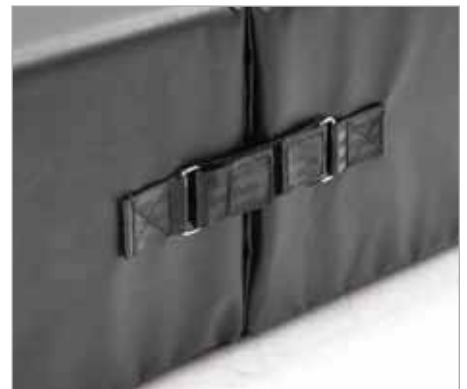

Divide and conquer, even on a budget!

Today, many hockey leagues and associations across North America are realizing the benefits of providing an increased ratio of practice-to-game time on the ice, and the value of 'shrinking' the space players have to work with, in order to increase the number of touches each player gets during practice, thus developing player skills at an accelerated rate.

Designed specifically for use with Cross-Ice training, Border Patrol Portable Foam Rink Dividers help you make the most of ice time. The BP Rink dividers can be combined to fit any rink width.

Panels come in standard 12, 22 and 42 inch heights, and are constructed of high-density, open-cell foam pads covered with tear resistant and puncture-resistant vinyl. Heavy-duty Velcro straps connect the panels, allowing for fast and easy set-up and take-down. BP pads can be set up on ice, or any other level indoor or outdoor playing surface.

BP foam pads can be fitted with clear vinyl 'windows' to accept advertising, allowing you to turn your rink dividers into an income stream. BP pads are also available with optional custom screened logos, giving you the option to advertise for your own brand or another way to sell ad space to sponsors. Standard color is black; some custom colors are available.
